LIST OF BMS DOCUMENTS 11

Stratton Products Ltd.

Preface

This Business Management System Manual (BMS) summarises how the BMS and its interrelationships work, either by flow/activity diagrams or text where appropriate. The BMS Manual, by design, points the reader to the relevant procedures used by the organisation, which in turn form the back-bone of the BMS.

This document itself is subject to continual improvement, and any reader may suggest ways to make it better. Please forward your comments to the Compliance Manager.

Stratton Products Ltd.

Business Management System (BMS) General Requirements

To ensure the implementation and achievement of the Company Policy Statement and Objectives

Stratton Products Ltd.

Management Responsibility and Authority

Management Commitment:

Top Management defines and communicates the business objectives, and provides the resources and dedicated infrastructure necessary to accomplish those objectives, and monitors the performance of the organization's effectiveness and efficiency in meeting these objectives. This is done to ensure consistency in product and process quality and enable it to meet current and evolving customer requirements.

Customer Focus:

Management ensures that customer requirements are understood and are met.

Organisation and Responsibilities

The following job descriptions and definitions are not exhaustive, but define the core job requirements.

Managing Director:

To ensure that; Stratton Products Ltd. operates in a reputable and efficient manner.

The M.D. is responsible for:

- The Business Policy
- The acquisition and promotion of new business activity.
- Human Resources and Training. Assuring the company management team has defined training needs and have trained resources for performance of work and verification activities.
- Procurement activities

Production Facilities

Production is performed by companies in the Far East, and all responsibilities for site activities is wholly owned by the relevant supplier. Stratton Products Ltd. actively seeks ISO9001 certified manufacturing facilities.

Management Representative:

The Compliance Manager (CM): Irrespective of other responsibilities is responsible for all aspects of Quality and Environmental System maintenance, awareness and reporting (internal & external), and has the authority to suspend any suspect or non-conforming product or processes. The CM represents the Customer and Interested Parties on all Environmental and Quality related matters.

Quality Control Managers:

The respective manufacturing facilities have their own quality control managers for all aspects of production quality control, the calibration and control of all measuring devices. These QC Managers and their deputies have the authority to suspend the production of any suspect or non-conforming product.

Finance Manager:

Responsible to the M.D. for the administration of the company accounts

Account Managers:

Responsible for representing their customers within Stratton Products Ltd. including contract review and the setting of quality objectives related to those customers, including the determination of customer satisfaction.

Technical Manager(s):

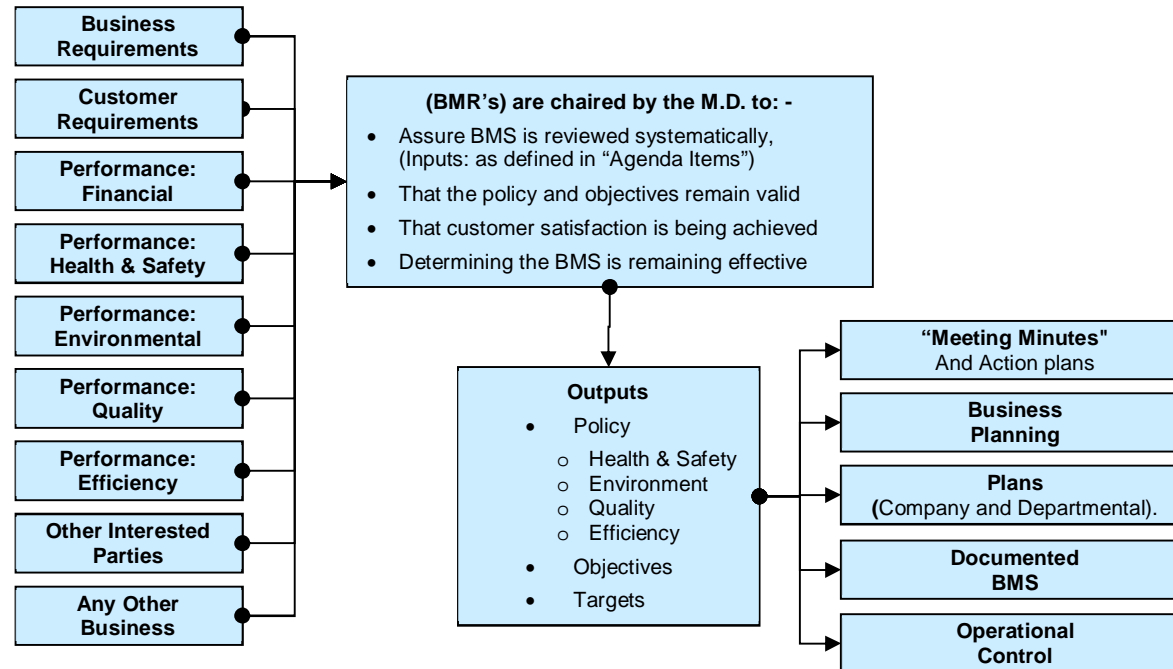

The respective manufacturers provide comprehensive technical support to both Stratton Products Ltd. and its customers.

Employees:

It is the duty of every member of staff whether permanent, temporary or sub contract, to;

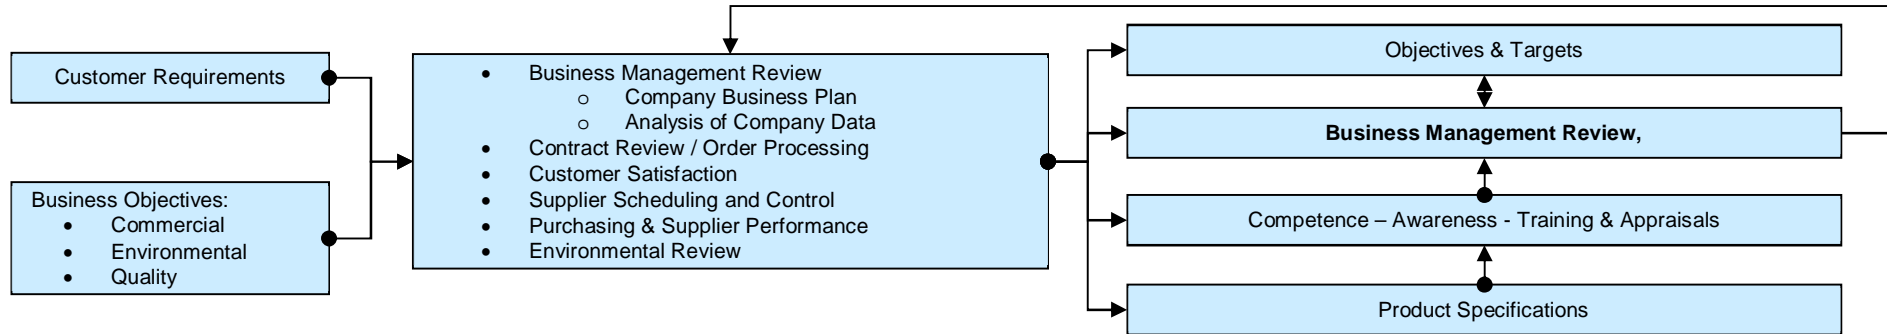

- Ensure that they are made fully aware of the Environmental and Quality aspects of the activities or processes that they are detailed to carry out
- Always act in accordance with the requirements of any applicable instructions, whether verbal or written, given to them by a competent authority.
- To report to their supervisor any occurrence which they consider may damage or present a threat to the environment, or business management system.

Business Management Review (BMR)

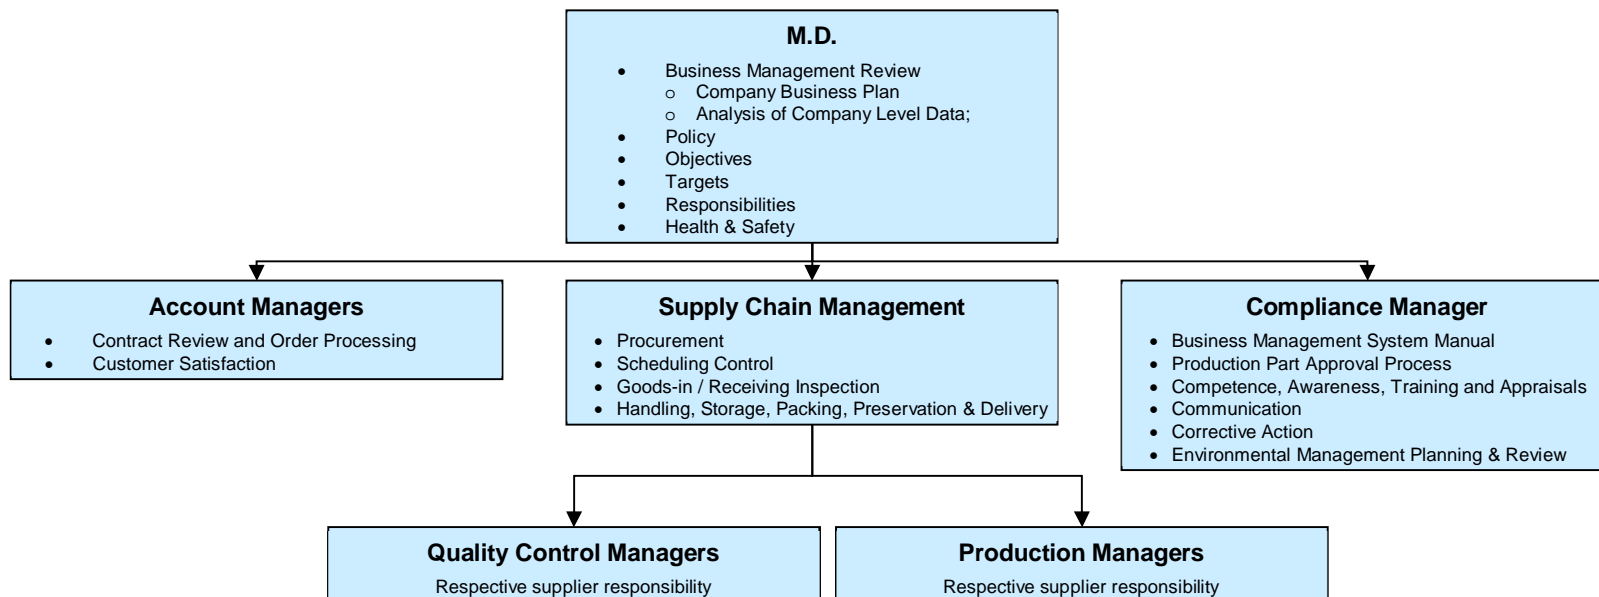

Stratton Products Ltd.

Business Planning

Implementation and Operational Control (Process Ownership)

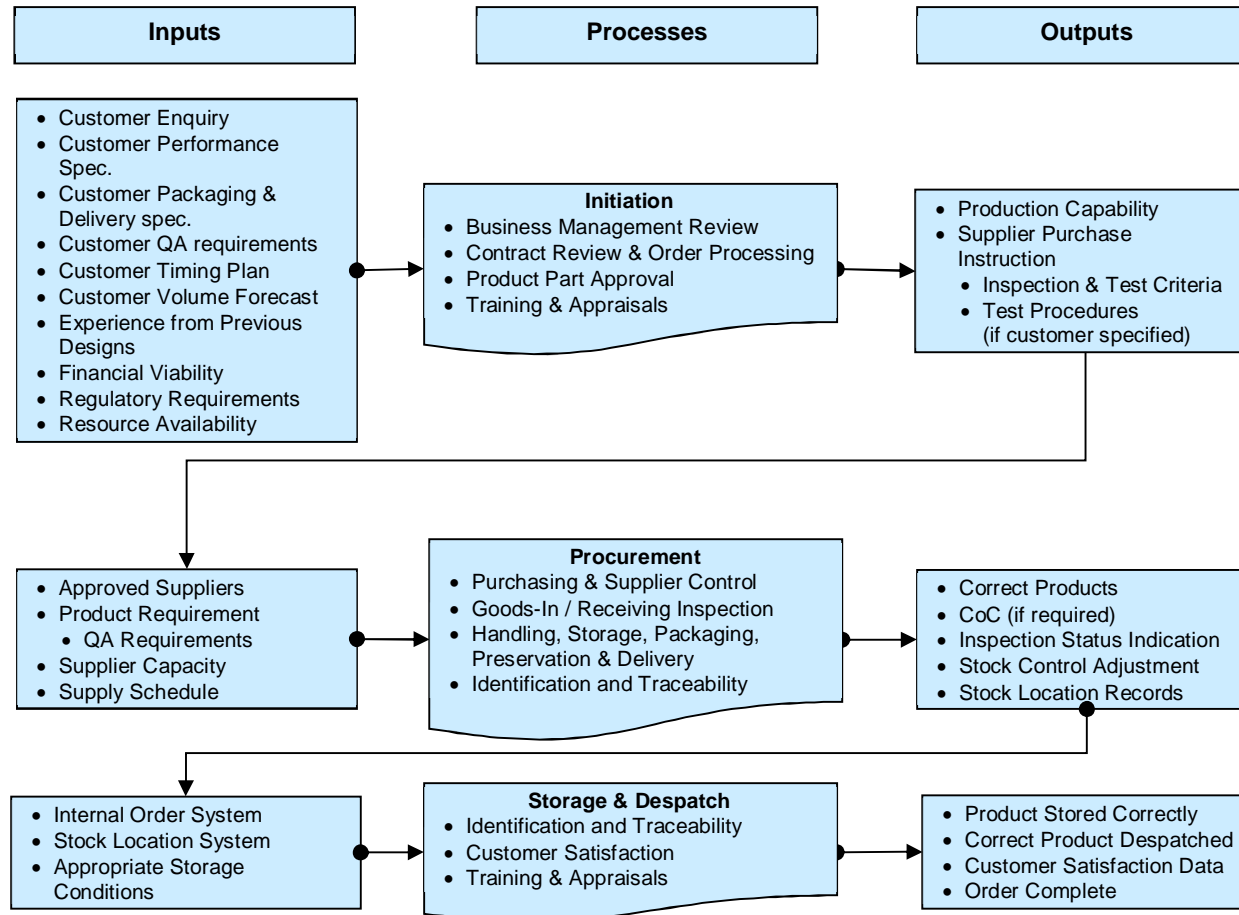

Day to day operational control is achieved by the use of formal procedures, work instructions, and process flow charts as necessary. These documents are detailed as part of the company's documented BMS, and roles and responsibilities are defined in the relevant BMS procedure.

Stratton Products Ltd.

Product Realisation Process

Level 2: Procedures may have multiple occurrences, Level 4: (SOP's etc.) are not listed.

Stratton Products Ltd.

Infrastructure

The business planning process determines, provides and maintains the infrastructure needed to achieve conformity to product requirements. Infrastructure includes:

- Buildings, workspace, equipment and associated utilities
- Supporting services (such as transport or communication).

Plant, facility and Equipment Planning

A multidisciplinary approach is used for developing facility and equipment plans. Where possible, layouts optimise material travel, handling and value-added use of floor space.

Work Environment

Working environments are suitable for all employees and are kept in states of order, cleanliness, and repair with appropriate environmental control of work-space, equipment and materials

Personnel Safety

Safety and the means to minimize potential risks to employees are addressed especially in the storage of product.

Confidentiality

All details of customer contracted developments, products and associated documentation and Information shall be treated with the strictest confidentiality and may only be passed to a third party with the prior written agreement of the customer.

Continual Improvement

Continual improvement is use in all activities as part of company culture; this is achieved by the constant application and monitoring of the documented BMS, the analysis of company level data, customer satisfaction reviews. The Company makes every effort to improve its continuous improvement methodologies and to disseminate this knowledge to all members of staff.
